

Insurances

We take all insurances that are accepted at other Circle Health physician offices, including MassHealth. Depending on your insurance carrier, you may have an Urgent Care-specific co-payment or office visit co-payment that is assessed.

When to visit the Emergency Department

A visit to the emergency department of the nearest hospital is your only option if your condition could cause significant harm or death without expedited medical attention. Dial **911** for immediate assistance when you have a life-threatening situation, such as **chest pain, severe bleeding, difficulty speaking or breathing, or other major trauma**. For serious medical conditions, Lowell General Hospital has two emergency departments operating 24 hours a day, seven days a week at the Lowell General Hospital Main and Saints campuses.

When illness and injury can't wait

Circle Health's Urgent Care centers provide walk-in, urgent care for non-life threatening conditions and other ailments that require prompt medical attention. In addition, we offer Occupational Medicine Services and Travel Medicine for those traveling abroad.

Unlike many other urgent care clinics, our Urgent Care centers are staffed with experienced urgent care physicians from Merrimack Valley Emergency Associates who are available onsite during operating hours. With facilities located in Billerica, Dracut, Tewksbury and Westford, all

locations serve children, adolescents, adult and older adult patients with convenient, accessible care without an appointment.

Urgent Care is a great alternative when injury or illness is not severe enough to require a visit to the emergency department, or when your primary care physician (PCP) or pediatrician is unavailable. We are here to assist and will communicate with your doctor to ensure that any needed follow-up care is coordinated. Prescriptions are electronically sent to your pharmacy of choice for your convenience.

Patients do not need a Circle Health primary care physician to use our Urgent Care centers. Our patients will benefit from streamlined connections to Circle Health specialists and providers, as well as services, programs, and support offerings from Lowell General Hospital.

Occupational Medicine Services

New workers compensation injuries can be seen on a walk-in basis Monday – Sunday 8:00am – 8:00pm.

Services such as pre-employment physicals, required screenings and pulmonary function tests are available Monday – Friday from 8:00am – 4:00pm. Please call 978-458-6868 to make an appointment.

Services and Conditions

Our Urgent Care centers provide walk-in care for non-life threatening conditions and other issues that require prompt medical attention and those needing X-rays or laboratory tests, including:

- Respiratory infections (common cold, flu, sinus infection, and bronchitis)
- Sore throat
- Earache
- Vomiting and diarrhea
- Scrapes, laceration, and minor burns
- Sprains and minor fractures
- Muscle aches and pains
- Routine gynecological problems
- Urinary tract infections
- Minor eye injuries, infections or irritation
- Dressing changes
- Workplace injuries
- Sports injuries
- Physicals (work, camp, and sports)
- Skin conditions such as poison ivy, ringworm and acne
- Testing for common issues, including: strep throat, mononucleosis, pregnancy, glucose, and diabetes
- Prescription orders for needed medication
- Moderate back problems
- Travel Medicine: Vaccinations, prescriptions, and education for those traveling abroad. Appointments available by booking online at www.circle-health.org/urgentcare.
